

# RMLSweb Watch List Now Features Notes Field

Ever get a notification for a watch list item, and forget why you were watching it? As of today, watch lists on RMLSweb now have a field for personal notes!

Users may either write notes when adding a listing to their watch list, or access their watch list via the RMLSweb Prospecting menu and use the button to add/edit notes to each listing. Note text may be formatted, and links added. Each note has a maximum of 500 characters, and notes are included when watch list notifications are sent to users via email or text message.

Since the [watch list was introduced on RMLSweb in 2016](#), we've had several requests for a notes field. We're happy to offer this improvement to subscribers, which is sure to help you in your business.
