

Listing Load Now Available in Firefox!

You can now use your Firefox browser to access Listing Load

One of the most common requests we have received in the  past is to update Listing Load so that it is compatible with the Firefox browser. As a result, in early February the RMLS™ Board of Directors voted to make Listing Load enhancements and Firefox compatibility a top priority for projects to complete in 2011. Well, we are happy to announce the ability to use Listing Load with your Firefox browser is now available!

To clarify, this announcement is in regard to the compatibility of Firefox with Listing Load. While there are some features of RMLSweb that still are not functional in the Firefox browser, this release is a major step toward full compatibility. (For a list of the functions that are still not fully compatible outside of Internet Explorer, please see Document 1765.) We have tested and approved Listing Load with Firefox Version 3.6.16 and Version 4, and we have also tested it in the Firefox browser on both Windows and the Mac operating system!

Here are some items to keep in mind when using Listing Load in Firefox:

- The look and feel of Listing Load will be slightly different in a new browser, so you may notice small changes in alignment, shape of fields, etc. Below is an example of different field shapes in Listing Load when using Firefox on a Mac. The fields that are more rectangular are the required fields, while the rounded (bubbled) fields are optional.

- Spell Check does not work when accessing Listing Load through Firefox. However, the Firefox browser is equipped with its own Spell Check that you may use.
- To print In-Progress listings from Firefox on a Mac, we recommend using Adobe Acrobat Reader instead of Macintosh's preview viewer. Adobe Acrobat Reader has more configuration options than the default viewer, allowing users to adjust margins and page size as needed to ensure correct layout and formatting of the printed In-Progress input forms.

If you have any questions or run into any problems or issues, please feel free to call Help Desk at 503-872-8002 or toll-free at 877-256-2169 and mention that you are using Firefox.
