

# Overview of Changes to Listing Load

In mid-September RMLS™ will be rolling out a streamlined Listing Load workflow for our subscribers. Changes include many compiled suggestions of our subscribers. Here is an overview of some of the enhancements that will be included with this version of Listing Load.

## Listing Load Screen

- To provide more viewing area the sidebar is no longer shown on listing load pages.
- The listing load Search Criteria can now be collapsed or un-collapsed by clicking on the section label.
- The “New Listing” and “Unlisted Sold” buttons have been moved from beside the search criteria to below.

## Search Results

- Search results can now be displayed as a list view or detail view.
- A thumbnail image of the first listing photo and map point have been added to both views.
- The columns have been re-ordered in the list view.
- The detail view tab will show search results on left-hand side of the page, with listing specific information on the right which displays the summary, photo, map, agent full, tax full and history reports.

## Add/Modify Listings

- When adding a new listing, the tax ID search is now built into the “New Listing” edit page.
- When adding or modifying a listing, the one long page has been broken up into section heading tabs, located on the left-side of the screen.

- You can now add and modify photos and captions from within the listing edit session.
- Date fields now display a calendar pop up to facilitate date selection. Dates can still be typed directly into the field.
- To make the links to the help text on the page more obvious, the help text is now highlighted as a hyperlink. The field labels are blue with dotted underlines, indicating they are help links, and the mouse pointer will change to show a small question mark on rollover.
- Listing edit screen now includes a Forms Alert tab to show the list of alerts related to listing completion rules such as missing required fields, date range violations or data type violations.
- When working on an in-progress listing auto-save runs every ten minutes. You can also save manually.
- At the top of the in-progress edit page now indicates a percent of all fields (excluding supplement fields) that have been filled on the main listing page.
