

OREF Users: zipForm® Integration Now Available on RMLSweb

RMLS™ subscribers who use OREF forms, great news—a new feature has been released on RMLSweb that helps make transactions easier. Technicians have rolled out mlsPush/SSO by zipLogix, enabling users to move seamlessly from RMLSweb into zipForm®.

While viewing an Agent Full report, clicking the OREF button will begin a new transaction within zipForm® and auto-populate some listing information into the cover sheet. Users wishing to manage all OREF transactions on their account should click the OREF/zipLogix link under the Toolkit menu or in the list of links on the RMLSweb desktop.

RMLSweb users will need to log in to zipForm® the first time they use this service, but future access will utilize single sign-on technology, meaning less hassle.

Those who prefer to keep using zipLogic's mlsConnect for forms will be able to do so.

Read more about this project or access tutorials on the OREF website.
