MLS Insight: Statistics Galore on RMLSweb

This post is part of MLS Insight, a series about how things work at RMLS™.

In our early years, RMLS™ leadership had the goal of positioning RMLS™ as the primary source for information about the residential real estate market—so statistical information has always been a priority. Then and now, RMLS™ provides compiled data and directs media to working REALTORS® for interpretation and projections.

In other words, our expertise is the WHAT, and we leave the WHY to industry professionals who have access to the buyers and sellers whose activity underpins the data on sales, prices, and listings.

Market Action

The first issue of our monthly statistical newsletter, *Market Action*, was published as four printed pages in March 1992. Today *Market Action* is 69 pages long and covers all the market areas we serve. Next year, we will be expanding coverage to

include separate stats for new construction and existing homes. Watch for a survey question in our Annual Subscriber Satisfaction Survey to weigh in on the most important data to include, or leave a comment below.

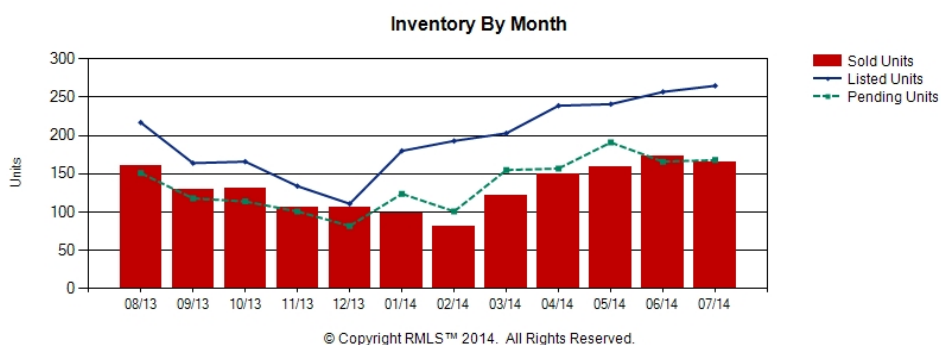

Market Trends and Market Stats

To explore the other statistics reports that RMLS™ has to offer, head to the **Statistics** tab on the RMLSweb menu bar.

RMLSweb also features video tutorials on how to use both Market Trends and Market Stats. (You can find these and others on RMLSweb by clicking on Training Tutorials under the Toolkit menu.)

Market Trends allows searching by geography (area number, city, ZIP code) and a few other criteria such as bedrooms, year built, lot size, etc. The resulting report produces not only a summary of data by month within the range you select, but also six graphs like the one below that are a click away from copying for your use in your own CMAs or newsletters.

Market Stats provides several reports. The Comparables Report has several additional graphs which depict sales data by sold terms and number of bedrooms. (See below for the type of info

available in the Comparables Report.) The Dollar Value by Area and Inventory Reports are strictly data reports that give a very streamlined overview of market areas.

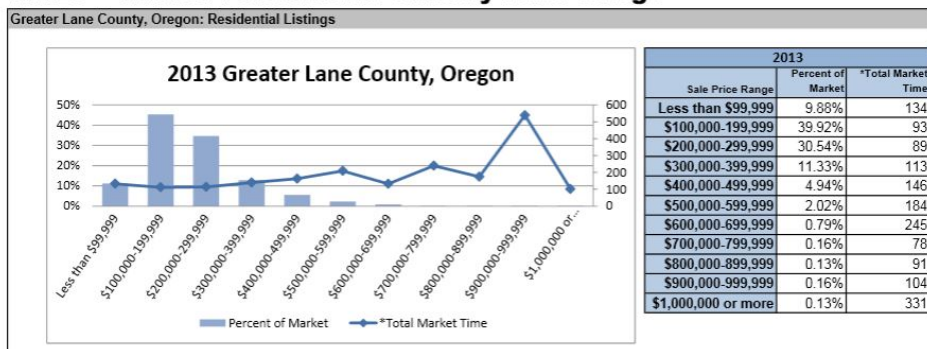

Bedrooms	Total Sold	Total Volume in 1000s		Sold Price		Sold Price Ratio		DOM		CDOM	
		Total LP	Total SP	Avg	Med	SP/LP%	SP/OLP%	Avg	Med	Avg	Med

Summary:	955	\$232,746	\$230,272	\$241,122	\$228,000	98.94	96.65	71	40	92	48

Home Sales Report

In addition to these dynamic reports which pull data according to criteria you select, RMLS™ also provides static reports under the **Statistics** menu. The Home Sales Report has information as early as 2001. Since July 2011, these reports have presented information for new construction—both separate from existing and combined.

Statistical Summaries

RMLS™ Market Percent and Time by Price Range

Finally, the Statistical Summaries compile years worth of *Market Action* historical data into a few pages and provide up to nine annual snapshots of various aspects of the residential real estate market in all our market areas. Access them under the **Statistics** menu on RMLSweb.

As you can see, RMLS™ takes stats seriously! If you would like to learn more about how to use stats in your business, call RMLS™ Training at (503) 236-7657 to get more information.

Thanks for taking this brief tour highlighting some of the statistical information available from RMLS™. Next month we will talk about envisioning an MLS without area numbers. If you have any questions you would like to have answered about how things work at RMLS™, I encourage you to post a comment to this blog.
