

# RMLS™ Broker Education Series (Eugene)

RMLS™ warmly invites real estate professionals to Eugene, where Fiona Douglas-Hamilton will present High Performance Heating Trends for Home Upgrades on Thursday, June 18th.

Faced with listing a home with an aging furnace? Do you have a home that always feels cold, no matter how high you turn the thermostat? Want some elegant and cost-efficient heating upgrades without breaking the bank?

This course is a practical guide through the world of high-performance heating systems. No drowning in technical knowledge—just what works, when, the benefits, the costs, and the savings.

Get to grips with AFUE, SEER, and HSPF and unravel what is and is not high efficiency. With heating and cooling accounting for 72% of annual energy use, your clients will thank you. After all, owning a home with lower utility bills was recently identified by the Shelton Group as the most effective marketing message to potential homebuyers.

This class is worth 3 CE for Oregon agents. Attendance is free, but registration is required. Register for High Performance Heating Trends for Home Upgrades.
