

New Trends in Heating, Cooling, and Hot Water Systems (Webinar)

Join Earth Advantage® and Fiona Douglas-Hamilton of SEEC LLC for a webinar that will provide a practical guide through the world of mechanical systems. No drowning in technical knowledge—just what works, the benefits, the costs, and the savings. This class will explore the latest trends in high performance heating, cooling, and hot water systems. Attendees will gain resources and the ability to assess the cost savings benefits of upgrading an existing system through payback/ROI calculations.

This webinar is the second part of a two-part series, Making Savvy Home Upgrades.
