

Updates to Statistical Features Coming Soon

New statistics menu makes spotting market trends easier

Keep an eye out for updates to statistical features on RMLSweb. The changes will combine most statistical reports into a new Statistics menu on the RMLSweb Navigation Bar. In addition we have rewritten the Market Trends, Market Stats and Inventory reports to improve the searching and reporting of these reports.

For example, Market Trends Report will now allow you to search up to 36 months back and will provide you with inventory accumulation and sale price percent change calculations.

Want to learn more about these new reports? Call our Training Manager, Kerry Meeuwsen at 503-872-8051.
